Website Designing and Hosting

Our primary aim is to design and host websites. We also offer you a unique World Wide Web address that allows users to access your information. Our servers are located in the US and provide the fastest possible access to the Internet. We can assist in the website design of your company or even re-design your current website. We are one of the leading website design consultants, specializing in providing e-business technology solutions for small and medium-sized businesses.

We have extensive expertise and some of the best Technical Consultants and Designers in the business!

Web hosting was never the same as it is with us. We possess our own Win2003 / Win2000 / Linux webserver based in US with an excellent bandwidth and up time.

When developing a new site, we strive to help you plan for a site that is fast loading, user friendly, and more importantly. . . a site that ranks high in search engine ranking. There are no boundaries to what a well designed website can accomplish. Precise planning of your site will give you the opportunity to use the most powerful marketing tool ever to be created.

Let our team of experts assist you in your next venture. We can develop a site plan and flow and deliver a web product that fits with your business needs.

Web Promotion

Creation does not end the work of building the Website, an important part of the job is Web Promotion, i.e. making your site popular on the Internet. We do this by SEO and managing your advertising on the World Wide Web to give greater visibility and also to enable surfers to visit your site from any search engine. Imagine bringing in hundreds of new customers every month. Orsent Technologies delivers targeted, qualified customers directly to your website, with instant tracking capability, competitive prices, and great service.

We provide customized packages for our esteemed clients depending on their individual requirements
